Personal Details:

18/05/2004

Full-Stack Developer with 2+ years delivering **secure, scalable HealthTech and SaaS platforms**. Skilled in **React, Next.js, Java, Spring Boot, Python, Node.js, Docker, AWS, SQL/NoSQL, REST APIs, and Microservices**. Strong track record in **rapid MVP delivery, GDPR-compliant systems, and impactful digital solutions**.

## Profile

- Full-stack developer with 2+ years building **secure, scalable HealthTech & SaaS platforms** (microservices → React/Next.js UIs).
- Delivered **GDPR-compliant clinical research systems** with HL7/FHIR, oncology modules, and an Open Science portal.
- Founded **NeoTap (SuperSprint Fusion winner)**; built a modular website builder + lightweight CRM and launched an AWS e-commerce platform (+45% sales).
- Product-minded collaborator skilled in **Java, Spring Boot, Python, FastAPI, Node.js, SQL/NoSQL, Docker, AWS, CI/CD**; seeking a long-term international role.

## Accomplishments

### Hospital Virgen del Rocío - GISC/IBIS

- Led the development of a **GDPR-compliant clinical research platform**, connecting multiple databases and normalizing data into a **common adaptable model**, improving patient data management and workflow efficiency.
- Built **oncology patient tracking modules**, enabling better treatment monitoring.
- Developed **pharmacogenomics analysis tools** to recommend optimal drug dosages.
- Implemented an **Open Science portal**, connecting researchers and clinicians for collaborative knowledge sharing.

### NeoTap

- Founded **NeoTap**, a modular website-builder + lightweight CRM, **winning SuperSprint Fusion** competition.
- Enabled users to **create fully functional web pages in under 2 minutes**, streamlining digital onboarding for small businesses.
- Designed scalable architecture allowing fast feature iteration and integration.

### El Quiosco de Sarita

- Delivered a **full e-commerce platform** from scratch, deployed on AWS, with secure payment and user authentication.
- Integrated backend (Java/Spring Boot) and frontend (React/Next.js) into a **production-ready platform**.
- Boosted **sales by 45%** after platform launch through improved UX and streamlined purchase flow.

## Professional Experience

### Full Stack Developer , FISEVI, Seville

Jan 2024 — Present

Hospital Universitario Virgen del Rocío — Research & Innovation

- Led end-to-end development of a clinical research platform, covering architecture, REST APIs, and front-end UX with GDPR-compliant data handling.
- Built oncology patient tracking modules for enrollment, longitudinal follow-up, and outcomes dashboards used by multidisciplinary teams.
- Developed pharmacogenomics data processing and visualization tools; standardized data exchange with EHR/LIS via HL7/FHIR integrations.
- Delivered an Open Science portal enabling dataset publishing, reproducible workflows, and role-based access across research groups.
- Coordinated a cross-functional team (planning, code reviews, CI/CD) to improve delivery cadence and code quality.

### Founder & Full Stack Developer, NeoTap, Seville

Jun 2025 — Present

- Founded a product focused on a modular website builder with an integrated lightweight CRM for SMEs.
- Defined scope and architecture; implemented back-end APIs, front-end UI, authentication, and role-based permissions.
- Launched the MVP, onboarded early users, and iterated rapidly from feedback to refine UX and core modules.
- Recognized as SuperSprint Fusion winner.

### Full Stack Developer, El Quiosco de Sarita, Seville

Sept 2024 — Sept 2025

- Freelance engagement delivering a full e-commerce platform for a high-profile Spanish influencer.
- Designed catalog, cart/checkout, and order management; integrated payments, shipping, and inventory.
- Implemented SEO, analytics, and performance optimizations; coordinated launch, training, and handover.
- Maintained the site through the first sales season, addressing issues and iterating on UX.

## Education

### Salesianos de Triana, Seville

Higher Degree in Multiplatform Application Development, Sept 2022 — Mar 2024

- Advanced vocational program focused on designing, building, and deploying cross-platform applications.
- Core technologies: Java & Spring Boot; JavaScript/TypeScript with React and Next.js; Python (FastAPI); Node.js; SQL & NoSQL.
- Engineering practices: REST APIs, microservices, containerization with Docker, AWS fundamentals, CI/CD, and testing.
- Methodologies: Agile/Scrum, Git-based collaboration, and code reviews in team projects.
